

As part of the **Cypriot Civil Society Strengthening Programme**, Cypriot partners, the NGO Support Centre and the Management Centre along with [INTRAC](#), (International NGO Training and Research Centre), would like to announce a call for Cypriot Civil Society Organisations (CSOs) to apply to take part in the Programme's Long-Term Capacity Building Support.

This component aims to provide a highly focused programme of support to a selected number of CSOs. The participating organisations will take an active part in shaping their own development strategies. They will be accompanied by Consortium consultants in their assessment and diagnosis of the organisational capacity and in the design, implementation and review of a medium-term development plan.

Criteria for Civil Society Organisations to apply include:

- CSO must be established and in full operation for a minimum of 2 years
- CSO has recognised the potential for organisational growth
- CSO is prepared and able to commit at senior level to the process and time required.

Please do not pass up this great development opportunity for your organisation!

For more information and to fill out an expression of interest form by the deadline of 12th November, please see the websites below:
